Jacobson *et al.*

Date of Priority: 05/01/1998

The response filed November 4, 2004 has been entered.

The Amendment to the Specification and Claims filed on November 14, 2004 is acknowledged and has been accepted

Claims 67-80 are allowed

Applicant's arguments have been considered and are found persuasive.

The rejection under 35 U.S.C 103 (a) as being unpatentable over Lin *et al.* in further view of Campbell, A..M. has been withdrawn. Applicants have overcome this rejection by providing a declaration in accordance with *In re Katz*, 215 USPQ 14 (CCPA 1982) establishing that Nasreen Aboul-Ela was not and is not a co-inventor.

The rejection under 35U.S.C. 112, first paragraph, as failing to comply with the written description requirement, i.e., the specification and claims as originally filed do not lend support for the limitation of an isolated antibody that binds to a protein which catalyzes the release of ADP-ribose from an ADP ribose polymer has been withdrawn. Applicants have overcome this rejection by amending the claims to qualify "protein" with support being found in the specification as originally filed.
